Description

The Bavaria Sport 39 HT is a model made to scale with other lengths in the range, but with the advantage that its dimensions allow for more rational play with spaces, without being subject to narrowness or any limitation. Sporty, versatile cruise program, without superfluous elements and with what is necessary to feel good sailing. It is one of the most accomplished models in the range. At the wheel it shows a great turn response, with stability in sporty driving and especially seaworthy, especially cutting the bow wave. Very coherent program, based on a product with an attractive price-quality ratio, with few details pending modification, well studied and capable of satisfying the demands of lovers of sport and family cruises. The average height of the entire cabin is 2.10 meters, the numerous hatches, portholes and skylights make the interior of this boat a surprising space due to the sensation of spaciousness and natural light that is breathed. In general, Bavaria in all its motor boats hastens the measurements quite a bit, but in this case the 39 feet give so much of itself that the design office has not been forced to force the proportions, because the result is a balanced boat in the distribution, loose in spaces, comfortable and clear, without useless furniture or decorative stumbling blocks. Skipper service included in the price
